### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of "a heart model comprising a rigid structure defining at least one cardiac member; and an affixation surface defining a portion of the heart structure, wherein the affixation surface is formed from a material that permits lead affixation, wherein the affixation surface is a plug retained within an opening in the heart structure" are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, Garoni et al. disclose a rigid heart structure (col. 2, lines 37-38) defining at least one cardiac chamber; and an affixation surface is formed from a material that permits lead affixation; multiple affixation surfaces; the multiple affixation surfaces are coded to visually indicate a status (col. 2, lines 43-46). However, the prior art fails to teach "a heart model comprising a rigid structure defining at least one cardiac member; and an affixation surface defining a portion of the heart structure, wherein the affixation surface is formed from a material that permits lead affixation, wherein the affixation surface is a plug retained within an opening in the heart structure".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed 22 January 2004 are considered informal.

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
